Allowable Subject Matter

1. Claims 35-46 are allowable over prior art.
2. The following is an Examiner's statement of reasons for the indication of allowable subject matter based on Amendment filed on June 2, 2010:

As in claim 35, the prior art of record fails to teach or fairly suggest an optical recording medium having the following features: two or more groups of sub-code frames spirally or concentrically recorded thereon: a first and second type subcode data, identical first and second subcode data being repetitively recorded in a circumferential direction at substantially regular physical intervals of the recording medium around an entire circumference of the medium, including data for uniquely identifying the recording medium, the intervals at which the first and second subcode data are recorded corresponding to a linear velocity for accessing the medium via the recording/reproducing device.

As in claim 43, the prior art of record fails to teach or fairly suggest a recording/reproducing device having the following features: configured to access a recording medium which includes data structured per sub-code frame, and, having two or more groups of sub-code frames spirally or concentrically

Art Unit: 2627

recorded thereon, comprising: a read/write unit configured to access a first and second subcode data recorded in a plurality of locations on the medium, identical first and second subcode data being repetitively recorded at locations in a circumferential direction at substantially equal distance apart from each other around an entire circumference of the medium, including data for uniquely identifying the recording medium, the intervals at which the first subcode data are recorded corresponding to a linear velocity for accessing the medium.

The features indicated above, in combination with the other elements of the claims, are not anticipated by, nor made obvious over, the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Related Prior Art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yoshio (4,996,679) is pertinent because Yoshio teaches a plurality of subcode in a recording medium.
